

Prevailing Wage in Minnesota

Local wages for local work

Minnesota prevailing wage laws advance regional economic policy by ensuring that workers on Minnesota's publicly funded construction projects are paid local wages. "The main purpose of a prevailing wage law is to protect local construction labor standards in the competitive bidding process."¹

What are state prevailing wages?

Prevailing wages are established by the Minnesota Department of Labor and Industry through an annual survey of actual wages paid to construction workers in your local community.

When do prevailing wage laws apply?

State prevailing wages are paid on:

- State-funded road, highway, street, airport, bridge, power plant, water treatment and utility construction projects.
- State-funded building construction projects.
- State-funded economic development construction projects.
- Locally funded construction projects where the prevailing wage has been required by local law or contract.

"It is in the public interest that public buildings and other public works be constructed and maintained by the best means and highest quality of labor reasonably available and that persons working on public works be compensated according to the real value of the services that they perform.

It is therefore the policy of this state that wages of laborers, workers, and mechanics on projects financed in whole or part by state funds should be comparable to wages paid for similar work in the community as a whole."

Minn. Stat. §177.41

Economic benefits

Prevailing wage laws keep construction costs stable while benefiting construction workers and local communities. The most comprehensive studies have found no impact on public construction costs while also finding that prevailing wage laws have the following positive economic impacts:²

- Local contractors are more likely to win bids on local construction projects.
- Increases annual incomes for construction workers by 5.2%
- Expands health insurance coverage for construction workers by 5%.
- Reduces construction worker reliance on food stamps by 2.1%

“Studies indicate that prevailing wage laws increase the wages and benefits of all construction workers, not just those working on prevailing wage projects.”

PREVAILING WAGE IMPACT ON MINNESOTA'S ECONOMY

Prevailing Wage results in increased participation in Registered Apprenticeship

Registered Apprenticeship, the formal training system of the construction industry, is funded privately by over \$30M annually in union and contractor funds. Registered Apprenticeship programs train Minnesota's future, diverse construction workforce³.

- 20% of Registered Apprentices in the construction industry are people of color.
- 6% of Registered Apprentices in the construction industry are women.
- 7% of Registered Apprentices in the construction industry are Veterans.
